Publication No. US20040106132A1

GENERAL INFORMATION:

APPLICANT: Bristol-Myers Squibb Company

TITLE OF INVENTION: INTERACT WITH AND/OR MODULATE PROTEIN TYROSINE KINASES AND/OR

TITLE OF INVENTION: PROTEIN TYROSINE KINASE PATHWAYS IN BREAST CELLS

TITLE OF PROTEIN TYROSINE TYROSINE KINASE PATHWAYS IN BREAST CELLS

TITLE OF UNDENTION: PROTEIN TYROSINE KINASE PATHWAYS IN BREAST CELLS

CURRENT APPLICATION NUMBER: US/10/648,593

CURRENT FILING DATE: 2003-08-26
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      gequence 204, Application US/10617334

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 541, Application US/09263959
Patent No. US20020150891A1
GENERAL INFORMATION:
APPLICANT: Hood, Leroy E.
APPLICANT: Rowen, Lee
APPLICANT: Koop, Ben F.
TITLE OF INVENTION: DIAGNOSTIC AND THERAPEUTIC COMPOSITIONS AND METHODS WHICH UTI
NUMBER OF SEQUENCES: 1279
CORRESPONDENCE ADDRESS:
                                APPLICANT: FORSTHE, TOOM
APPLICANT: BISHOP, MICHAEL D.
TITLE OF INVENTION: IDENTIFICATION AND USE OF MOLECULAR MARKERS INDICATING
TITLE OF INVENTION: CELLULAR REPROGRAMMING
FILE REPERBENCE: 028040-0209
FILE REPERBENCE: 028040-0209
CURRENT APPLICATION NUMBER: US/09/876,143
CURRENT FILING DATE: 2001-06-06
PRIOR PILING DATE: 2000-06-07
PRIOR FILING DATE: 2000-06-07
WUMBER OF SEQ ID NOS: 1144

US-10-287-949A-6732

Sequence 6732, Application US/10287949A

Sequence 6732, Application US/10287949A

Publication No. US20040102389A1

GENERAL INFORMATION:

APPLICANT: Riborayme Pharmaceuticals, Inc.

APPLICANT: Berobedo, Jaime

APPLICANT: Stinchcomb, Dan

APPLICANT: Stinchcomb, Dan

APPLICANT: Becobedo, Jaime

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION: UNMBER: US/10/287,949A

CURRENT APPLICATION NUMBER: US/10/287,949A

CURRENT FILING DATE: 2003-04-11

NUMBER OF SEQ ID NOS: 20822
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ö

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Chowrira, Bharat

APPLICANT: McSwiggen, Jim

APPLICANT: Stinchoomb, Dan

TITLE OF INVENTION: Method and Reagent for the Inhibition of Telomerase Enzyme

TITLE OF INVENTION: Method and Reagent for the Inhibition of Telomerase Enzyme

TITLE OF INVENTION: Momber: US/09/653,225

CURRENT APPLICATION NUMBER: US/09/653,225

PRIOR FILING DATE: 2000-04-14

PRIOR APPLICATION NUMBER: 60/150,713

PRIOR FILING DATE: 1999-08-31

PRIOR FILING DATE: 1999-08-31

NUMBER OF SEQ ID NOS: 5586

SOFTWARE: Patentin version 3.0
